

## Individualized care means faster recoveries.

When it comes to rehabilitation, one size definitely does not fit all. Here at **MVNRC**, individualized rehabilitation programs are designed around each patient's specific needs.

Individual capabilities and limitations are carefully evaluated and used to establish realistic goals and optimum care plans. Therapies are age-appropriate and may take the patient's occupation, lifestyle and even favorite sports or activities into consideration. We also provide needed specialized services, including wound care and pain management, to enhance care plan compliance and outcomes.
