

If you have a patient like Mrs. Whitney, she needs a specialized geriatric rehabilitation program that –

- ❑ Focuses on geriatric rehab as a distinct discipline
- ❑ Addresses multiple medical conditions that impact outcomes
- ❑ Utilizes a collaborative, multi-disciplinary team approach
- ❑ Employs therapists and nurses specially trained and experienced in geriatric rehabilitation
- ❑ Relies on individualized treatment regimens
- ❑ Respects and recognizes the unique capabilities and limitations of elderly patients
- ❑ Delivers rehabilitative services within a continuum of care

For more than 25 years, MVNRC has been caring for seniors in the Mount Vernon-Alexandria community. Our Geriatric Orthopedic Rehab Program is a natural extension of that unique experience, knowledge and special expertise. In fact, last year alone MVNRC treated over 130 post-surgical diagnoses for patients just like Mrs. Whitney.
